

# CloudSecure

## Electronic Visitor Management

### *Central Access & Communication Estate Solution*

CloudSecure Visitor Management is a compliant turnkey solution that manages access for your visitors, domestics, contractors, garden services, and regular family members all from the palm of your hand.

The smart electronic mobile app per resident also includes a panic button for emergency services, facilities management to log incidents related to water, electricity & security concerns with a photo log that automatically routes to the correct department or person to action.

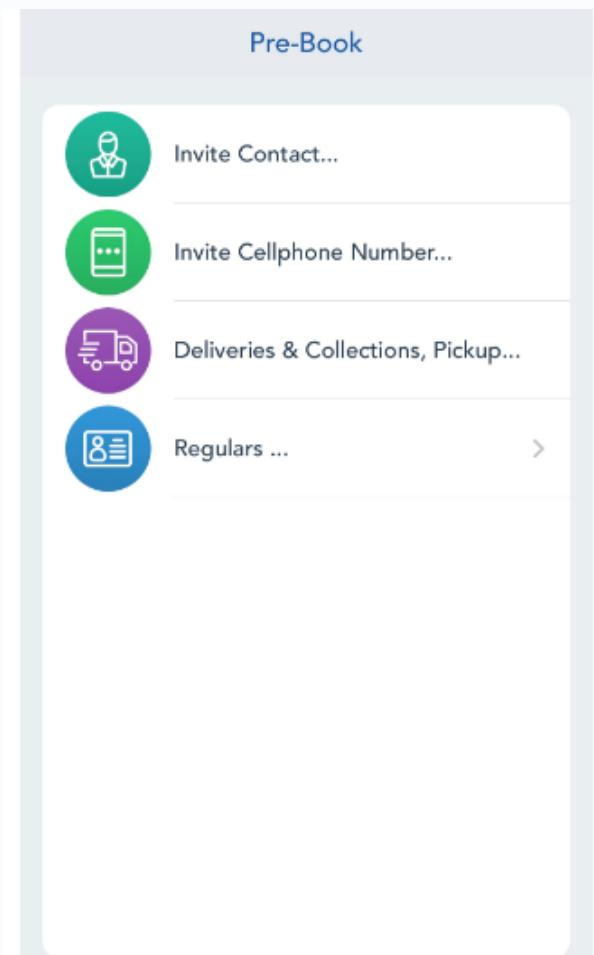

With busy lifestyles and virus infection concerns we offer a central communication platform which allows estate members to send out notices or a voting pole for approval for related estate requirements allowing for contactless actions real-time.

# RESIDENT CENTRAL CONTROL IN THE PALM OF YOUR HAND
